

RFP#2024-04WFS

Questions #1

1. Please confirm the number of copies of the proposal that are required at Submission.

Answer: 3 copies total

2. Page 2 of the proposal “contractor information Form” references both the District Contact Person and also the Newman Sales Representative. Who should be listed in both locations.

Answer: Depending on the structure of the vendor this could be the same person – however some companies have a designated Sales Representative at the start of a project for each company they service and then a separate Contract Person that would the contract through the entire project that is separate from the initial Sales Representative.

3. In the existing riser room, it appears that the riser closet might not be large enough for the additional riser. If removal of the walls and the installation of a pipe railing would need to be done, would this work be performed by NIA or should it be included in the proposal?

Answer: The cost of this work should be separated out in the proposal as a separate line item in order to give NIA the option of including it in the awarded work or not including it.
